Marietta – Cobb County

Marietta Makerspace

The Maker Station

The space, equipment and community to:

Create and Invent

Who We Are:

The Maker Station is a collaborative, shared workspace where curious and like-minded individuals can come together to work on projects, discover new areas of interest, develop a new business idea, or simply grow their personal hobbies. The space serves the interstate corridor northwest of Atlanta, GA. This includes Marietta, Kennesaw, Acworth, and surrounding areas. We are just starting our journey to build this space and we are looking for interested community members to help grow and shape this makerspace into a thriving, lively environment.

What Do We Do?

At The Maker Station you will find members with a WIDE variety of interests including, but not limited to:

- 3D Printing

- Sewing and Leatherworking

- Power Racing Series/Powerwheels

- Computers and Programming

- Candy Making

- Gaming (Playing and Creating)

- Micro-Computers/RaspberryPi/Arduino

- … and so much more.

Screen Printing Tutorial

"What do you want to make today?"

"Why buy it for $10 when I can get all the supplies to make it myself (Yes, It will be more expensive, but I'll learn a lot)."

"I Think I can make that."

"We'll add some tape and call it a feature."

"Well I didn't expect that to happen."

Computer Programming Class
